TECHMAP

AI BUSINESS STARTER KIT

Discover. Build. Automate.

A practical launch pack for solo founders, freelancers and small businesses

100 AI prompts • Business launch guide • 30-day content calendar
Customer message templates • AI tool selection checklist

EDITION 1.0 | NOVEMBER 2026

Welcome to your first 30 days

This kit helps you turn an idea into a small, testable offer. It is designed for action—not theory. You do not need to use every prompt. Pick the ones that match your business, add your real details, and review every AI-generated answer before using it.

A simple rule: AI drafts; you decide.

Use AI to speed up research, planning, writing and brainstorming. Verify facts, prices, legal or tax requirements, and product claims independently. Never paste passwords, private customer information, payment details or confidential business data into an AI chat.

How to use the prompts

1. Replace every bracketed field such as [product] or [target customer].
2. Give useful context: location, budget, skills, customer type and constraints.
3. Ask for a first draft, then request revisions with specific feedback.
4. Test important recommendations with real customers before investing.

Your first-week outcome

By the end of Week 1, aim to have one clearly defined customer, one problem worth solving, one simple offer, a basic price hypothesis and a short sales message.

1. Business launch guide

Step 1 — Choose a narrow customer

Avoid starting with “everyone.” Choose one reachable group, such as home bakers in your city, independent fitness coaches, local salons, student job seekers or early-stage online sellers.

Step 2 — Identify a painful problem

Look for a problem that is frequent, costly, frustrating or time-consuming. Interview 5–10 people in the target group. Ask what they currently do, what is difficult, and what they have already paid for.

Step 3 — Create a small offer

Describe the result, not just the deliverable. Example: “A 7-day Instagram content pack for independent cafés” is clearer than “social media services.” Start with a small scope you can deliver reliably.

Step 4 — Validate before spending

Show a sample, explain the outcome, ask for feedback and invite a paid pilot. A compliment is not proof of demand; a deposit or purchase is stronger evidence.

Step 5 — Deliver and improve

Set expectations in writing: scope, timeline, revisions, what the customer must provide and what is excluded. Ask for feedback after delivery and improve the next version.

One-page business canvas

CUSTOMER	Who exactly will buy?
PROBLEM	What urgent or recurring problem do they have?
OUTCOME	What useful result will you provide?
OFFER	What is included—and what is not?
PRICE	What price will you test first?
CHANNEL	Where can you reach these customers?
PROOF	What sample, demo or testimonial can build trust?

2. The 100-prompt library

Copy a prompt, replace the bracketed fields and add your context. Treat outputs as drafts. For research, ask the AI to separate verified information from assumptions and unknowns.

1. Idea and customer research

01. Act as a practical market researcher. My skills are [skills], my budget is [budget], and I can work [hours] per week. Suggest 5 small business ideas for [location/customer group]. For each, list the customer, problem, simplest offer and a low-cost way to validate demand.

02. Create 10 interview questions for [target customer] to understand how they currently solve [problem]. Avoid leading questions and focus on past behaviour.

03. Analyze this customer problem: [problem]. Identify who feels it most, how often it occurs, what alternatives exist and what evidence I should collect before building.

04. Create 3 customer personas for [product/service]. Include goals, frustrations, buying triggers, objections and where I might reach them. Clearly label assumptions.

05. Give me a competitor research worksheet for [market]. Include fields for offer, audience, price, positioning, reviews, strengths, weaknesses and gaps. Do not invent competitor facts.

06. Turn these customer interview notes into themes, repeated pain points, exact customer language and testable opportunities: [notes].

07. Rank these business ideas using customer urgency, ability to pay, competition, startup cost and my ability to deliver: [ideas]. Explain the scoring.

08. Suggest 5 ways to validate [idea] in 7 days without building the full product or spending on ads.

09. Write a concise survey for [target audience] about [problem]. Keep it under 8 questions and avoid asking for sensitive personal data.

10. List the assumptions behind my idea [idea]. Separate high-risk assumptions from low-risk ones and suggest the cheapest test for each.

2. Offer, positioning and pricing

01. Help me define a one-sentence offer for [customer] who needs [result]. Give 5 versions that are specific and credible.

02. Create 3 service/product packages for [offer]: starter, standard and premium. Define deliverables, boundaries, turnaround and who each package suits.

03. Suggest a pricing test for [offer] in [market]. Explain cost-based, value-based and competitor-informed considerations; do not claim a market price without evidence.

04. Write a clear product description for [product]. Include target buyer, problem, benefits, what's included, format, delivery and limitations.

05. Create a positioning statement for [brand] serving [audience] in [category]. Make it distinct without unsupported superlatives.

06. List 10 common objections to buying [offer] and draft honest, non-pushy responses.

07. Design a simple guarantee or risk-reversal policy for [offer] that is fair, specific and financially realistic.

08. Turn these features into customer outcomes: [features]. Avoid exaggerated promises.

09. Create a scope-of-work checklist for [service], including included work, excluded work, client responsibilities and revision limits.

10. Review this offer and identify unclear wording, hidden costs, delivery risks and reasons a buyer might hesitate: [offer].

3. Branding and messaging

01. Suggest 20 brand names for a [type of business] serving [audience]. Check for pronunciation and obvious unwanted meanings, but remind me to verify domain and trademark availability.

02. Create a simple brand voice guide for [brand]: 4 traits, words to use, words to avoid and 3 sample lines.

03. Write a short homepage hero section for [business], including headline, supporting sentence and one clear call to action.

04. Create an about-us paragraph based on these real facts: [facts]. Do not invent awards, years of experience or customer numbers.

05. Write 5 tagline options for [brand] that communicate [benefit]. Keep them short and memorable.

06. Create a messaging matrix for [audience] with their pain point, desired outcome, key message, proof needed and call to action.

07. Rewrite this business description to be clearer and more customer-focused while preserving all factual details: [text].

08. Suggest a visual direction for [brand], including colour mood, typography style, imagery and layout principles. Keep accessibility in mind.

09. Write 3 versions of a 50-word business introduction: friendly, professional and energetic. Business facts: [facts].

10. Review this landing-page copy for clarity, trust, readability and unsupported claims: [copy].

4. Social media and content

01. Build a 30-day content plan for [business] targeting [audience] on [platform]. Mix education, proof, behind-the-scenes and offers. Include a realistic posting frequency.

02. Turn this customer question into 5 short-video hooks and a 30-second script: [question]. Avoid clickbait.

03. Create a carousel outline about [topic] with 7 slides: hook, problem, 4 useful points and a clear closing action.

04. Write 10 educational post ideas for [industry] that answer beginner questions and do not rely on trends.

05. Create a short caption for [post topic] in a [brand voice] tone. Include one useful takeaway and one natural CTA.

06. Repurpose this long-form content into a short video script, carousel outline, email and LinkedIn post: [content].

07. Suggest 5 recurring content series for [brand] that can be produced consistently with limited resources.

08. Create a content brief for a product demonstration video. Include objective, audience, scenes, on-screen text and CTA.

09. Review these post analytics [metrics]. Identify possible patterns and propose 3 experiments; do not claim causation from small samples.

10. Create a simple weekly content workflow for one person with [hours] available. Include batching, review and scheduling.

5. Sales and customer acquisition

01. Create a respectful outreach message to [type of customer] about [specific problem]. Keep it personal, brief and free of exaggerated claims.

02. Write a discovery-call agenda for a 20-minute call with a potential buyer of [offer]. Include questions, fit checks and next steps.

03. Create a lead qualification checklist for [service]. Include need, urgency, budget, decision-maker and delivery fit.

04. Write a follow-up message after a prospect has not replied to my first message. Keep it polite and low-pressure.

05. Draft a proposal for [client type] based on this scope: [scope]. Include deliverables, timeline, price placeholder, assumptions and exclusions.

06. Create a simple sales conversation flow that helps me understand needs before recommending [offer].

07. Suggest 5 ethical ways to find my first 10 customers for [offer] without spam or scraping personal data.

08. Write a referral request to a satisfied customer that makes it easy for them to introduce someone relevant.

09. Create a basic CRM tracker structure with fields for lead source, need, stage, last contact, next action and notes.

10. Analyze why this offer may not be converting using the following evidence: [data/feedback]. Suggest the next 3 tests.

6. Operations and delivery

01. Create a step-by-step delivery checklist for [service/product], from customer onboarding to final handover.

02. Write an onboarding email requesting only the information needed to deliver [service]. Include a secure way for the client to share files.

03. Create a project timeline for [deliverable] due in [timeframe]. Include review points and client dependencies.

04. Draft a quality assurance checklist for [deliverable] covering accuracy, usability, accessibility, spelling and final testing.

05. Create a standard operating procedure for handling a new order for [product/service].

06. List the recurring tasks in my [business type] and group them into daily, weekly and monthly work.

07. Create a customer feedback form with 5 concise questions about [product/service].

08. Write a polite message explaining a delay, giving the reason without oversharing, a revised date and the next update time.

09. Create a handover document outline for [project] including access ownership, files, instructions, limitations and support period.

10. Review this workflow [workflow]. Identify bottlenecks, failure points and safe automation opportunities.

7. Finance and planning

01. Create a simple monthly business budget for [business] with one-time costs, fixed costs, variable costs, taxes to investigate and emergency reserve.

02. Build a break-even calculation template for [product]. Ask me for selling price, variable cost and fixed costs before calculating.

03. Create a cash-flow tracker structure with date, income, expense, category, payment status and balance.

04. Compare these pricing scenarios using the assumptions I provide: [scenarios]. Show revenue separately from profit.

05. Help me estimate the time required to deliver [offer] and calculate an hourly effective rate from my price and hours.

06. Create a 90-day business milestone plan for [goal], broken into weekly actions and measurable evidence.

07. Review these expenses [list] and classify them as essential, optional or test-related. Do not recommend spending beyond my stated budget.

08. Create a simple sales forecast with conservative, base and optimistic scenarios. Clearly state that forecasts are assumptions, not guarantees.

09. List financial and tax questions a small business owner in [country] should verify with a qualified professional.

10. Create a monthly review template covering leads, conversions, revenue, costs, customer feedback and next month's experiments.

8. Website and digital product

01. Create a sitemap for a [business type] website with only the pages needed to help visitors understand, trust and buy.

02. Write a product-page structure for [digital product], including preview, benefits, contents, compatibility, delivery, refund terms and FAQ.

03. Create a checklist for testing a responsive website on mobile, tablet and desktop.

04. Draft an FAQ for [product/service] based only on these facts and policies: [facts]. Flag missing information instead of inventing it.

05. Suggest 5 small digital products for [audience] based on [skills/knowledge]. For each, define the problem, contents and validation test.

06. Create a clear outline for a practical PDF guide on [topic] for [beginner audience]. Include exercises and examples.

07. Review this checkout journey [steps]. Identify friction, trust gaps and accessibility issues.

08. Write a website privacy notice checklist for a small business. Explain that legal wording must be checked for the relevant jurisdiction.

09. Create a pre-launch checklist for a digital download store, covering file quality, payment test, delivery email, support and policies.

10. Turn this rough knowledge into an editable template product: [notes]. Define sections, instructions and a filled example.

9. Customer support and retention

01. Draft a friendly response to a customer asking [question]. Use only this policy information: [policy].

02. Write a response to a complaint about [issue]. Acknowledge the concern, clarify facts and offer a realistic next step.

03. Create a refund-request handling flow based on this policy: [policy]. Include escalation cases.

04. Write a post-purchase email that explains how to access and use [product], where to get help and what to do first.

05. Create a customer success check-in message for someone who bought [product/service] [timeframe] ago.

06. Summarize these support messages into issue categories, frequency and product improvements: [anonymized messages].

07. Draft a clear out-of-office support message with expected response time and urgent contact route.

08. Create a knowledge-base article outline for solving [common issue]. Use plain language and numbered steps.

09. Suggest ethical ways to encourage repeat purchases for [business] without manipulative urgency or unwanted messaging.

10. Write a short testimonial request that asks for honest feedback and does not pressure the customer.

10. AI workflow and productivity

01. Map a workflow for [task] and identify which steps can be assisted by AI, which need human approval and which should remain manual.

02. Create a reusable prompt template for [repeated task] with fields for context, inputs, constraints, output format and quality checks.

03. Design a weekly planning routine for a solo founder working [hours] per day. Include priorities, focused work and review.

04. Turn this process into a checklist that a new assistant could follow: [process].

05. Suggest low-risk automations for [business type]. For each, list trigger, action, human check and failure fallback.

06. Create a decision tree for handling [customer request]. Include cases where a human should take over.

07. Review this AI-generated content for factual claims, bias, privacy risks, tone and errors: [content].

08. Create a prompt that helps compare 3 options using criteria I provide, showing assumptions and unknowns rather than guessing.

09. Build a simple knowledge-base structure for [business] with categories, naming rules, ownership and update cadence.

10. Create an end-of-week review prompt that asks what shipped, what customers said, what generated revenue and what to change next week.

3. 30-day content calendar

Use this as a starting point. Adapt the platform, frequency and format to your audience. One useful post consistently is better than posting daily without a purpose.

Day	Theme	Format	Content idea	CTA
01	Introduce the business	Short video	Who you help and what problem you solve	Follow for practical tips
02	Explain a common problem	Carousel	3 signs this problem is costing time or money	Save this post
03	Share a practical tip	Short video	One actionable step viewers can try today	Try it and tell us
04	Behind the scenes	Photo/story	Show how you create or deliver the product	Ask a question
05	Answer an FAQ	Text/video	Answer one real customer question	Send your question
06	Myth vs fact	Carousel	Correct one common misconception	Share with someone
07	Weekly recap	Story	What you learned or built this week	Vote on next topic
08	Mini tutorial	Short video	Teach one small process step by step	Save for later
09	Checklist	Carousel	A 5-point checklist related to your niche	Save the checklist
10	Customer problem story	Text post	Describe a relatable scenario without inventing a testimonial	Have you faced this?
11	Tool spotlight	Short video	Show one tool and a realistic use case	Try the free option
12	Mistakes to avoid	Carousel	3 beginner mistakes and how to avoid them	Which one surprised you?
13	Product preview	Screen recording	Show a real sample or preview	See product details
14	Ask the audience	Story/poll	Ask which challenge they want solved	Vote
15	Step-by-step guide	Carousel	A simple process to reach a small result	Save this guide
16	Before/after process	Short video	Show workflow improvement; avoid false outcome claims	Ask for a demo
17	Founder lesson	Text/video	Share a genuine lesson from building the business	What did you learn?
18	Template/sample	Carousel	Give away one useful sample page	Comment with feedback
19	Objection answered	Short video	Answer a common concern honestly	Ask us anything
20	Niche glossary	Carousel	Explain 5 terms beginners hear often	Save for reference
21	Weekly recap	Story	Share progress and next week's focus	Choose next topic
22	Case walkthrough	Carousel	Walk through a hypothetical example, label it clearly	Would this help you?
23	Quick tip series	Short video	One tip in under 30 seconds	Follow for the next tip
24	Process breakdown	Carousel	Explain what happens after someone buys	Read the details
25	Customer feedback	Post/story	Share permission-based, unedited feedback if available	Learn more

Day	Theme	Format	Content idea	CTA
26	Free resource	Carousel	Offer a useful checklist or sample	Get the free resource
27	Comparison	Carousel	Compare two approaches fairly	Which suits you?
28	Product FAQ	Short video	Explain format, access, support and limitations	Visit product page
29	Offer reminder	Post/story	Explain who the offer is for and what is included	Check availability
30	Month-end reflection	Text/video	Share lessons, improvements and next month's plan	Suggest a topic

4. Customer communication templates

Personalize every message. Do not send bulk unsolicited messages. Respect platform rules, consent and customer preferences.

First outreach

Hi [Name], I noticed [specific, genuine observation about their business]. I help [type of customer] with [specific outcome]. I had one idea that may help with [relevant problem]. Would it be useful if I sent a short example?

Reply after interest

Thanks for getting back to me. To check whether I can help, could you share a little about [goal/problem], your preferred timeline and what you have already tried? I can then suggest a suitable next step.

Discovery call confirmation

Hi [Name], confirming our call on [date/time]. We'll discuss your current process, the result you want and whether [offer] is a good fit. If you need to reschedule, just let me know.

Proposal message

Thanks for sharing the details. Based on our discussion, I propose [deliverable] for [outcome]. The scope includes [items] and excludes [items]. Estimated timeline: [timeline]. Fee: [amount]. This is valid until [date].

Follow-up

Hi [Name], just following up on the [proposal/example] I shared. Is this still something you're considering? No problem if priorities have changed—happy to close the loop.

Order confirmation

Thanks for your order! Your [product/service] is confirmed. You can expect [deliverable/access] by [date]. To get started, please [next action]. If anything is unclear, reply to this message.

Delivery and handover

Hi [Name], your [deliverable] is ready: [secure delivery method]. Please review [specific items] and send any in-scope revision notes by [date]. The handover includes [files/instructions].

Request for feedback

Thanks for trying [product/service]. I'd appreciate honest feedback: what was most useful, what was confusing, and what should I improve? Your feedback is optional and will help shape the next version.

Delay update

Hi [Name], I'm sorry—the [deliverable] is taking longer than planned because [brief accurate reason]. The revised delivery time is [date/time]. I'll update you again by [time] if anything changes.

Support response

Thanks for flagging this. I understand the issue is [summary]. Please try [safe troubleshooting step]. If it continues, send [non-sensitive diagnostic detail] and I'll investigate. Please don't send passwords or payment card details.

5. AI tool selection checklist

Choose tools based on the job, not hype. Features, pricing and availability change, so verify current details on each provider’s official site before subscribing.

Need	Tool examples to evaluate	What to check
Writing and brainstorming	ChatGPT, Claude, Gemini	Output quality, privacy controls, file support, usage limits
Visual design	Canva	Templates, export formats, brand controls, commercial-use terms
Video editing	CapCut, DaVinci Resolve	Watermarks, export quality, device requirements, licensing
Online store	Gumroad, Instamojo	Country support, payment methods, fees, taxes, payout schedule
Website building	WordPress, Webflow	Hosting cost, ownership, integrations, export and maintenance
Email and newsletters	Brevo, Mailchimp	Contact limits, consent tools, automation and deliverability
Project management	Trello, Notion	Collaboration limits, data export, permissions

Before paying for any tool

• Test the free plan or trial with a real task.
• Check renewal price, cancellation terms and export options.
• Confirm commercial-use rights for assets and outputs.
• Check whether customer data is used for model training and adjust privacy settings.
• Avoid buying multiple overlapping subscriptions before you have paying customers.

6. Simple launch checklist

■ I can describe my target customer in one sentence.
■ I have spoken to at least five potential customers.
■ My product solves one clear problem.
■ I have a sample or preview that demonstrates quality.
■ The price, contents, delivery and refund terms are clear.
■ I tested checkout and download delivery myself.
■ I have a support contact and response process.
■ I have published useful content that attracts the right audience.
■ I am tracking visits, enquiries, purchases, refunds and feedback.

7. A realistic 30-day execution plan

Week 1 — Validate: Pick one audience, interview 5–10 people, review alternatives and choose one product idea.
Week 2 — Build: Create a small version, test it with 3 people and fix confusing sections.
Week 3 — Launch: Publish the sales page, test payment and delivery, and contact relevant communities without spamming.
Week 4 — Learn: Review traffic, questions, conversions and feedback. Improve the offer before increasing spend.

Important business note

This kit is educational material, not legal, tax, financial or investment advice. Check local requirements for business registration, GST, consumer protection, privacy, intellectual property and platform terms before selling. Never promise guaranteed income or use fabricated testimonials, fake scarcity or misleading claims.
